

Bridging TradFi with innovative exposure to digital assets

Institutional grade exposure to digital assets through issuing of ETPs, trading, strategic ventures, and Web3 infrastructure.

[DISCLAIMER]

This presentation of DeFi Technologies Inc. (“DeFi Technologies”, “DEFI” or the “Company”) is for information only and shall not constitute an offer to buy, sell, issue or subscribe for, or the solicitation of an offer to buy, sell or issue, or subscribe for any securities. The information contained herein is subject to change without notice and is based on publicly available information, internally developed data and other sources. Where any opinion or belief is expressed in this presentation, it is based on the assumptions and limitations mentioned herein and is an expression of present opinion or belief only. No warranties or representations can be made as to the origin, validity, accuracy, completeness, currency or reliability of the information. The Company disclaims and excludes all liability (to the extent permitted by law), for losses, claims, damages, demands, costs and expenses of whatever nature arising in any way out of or in connection with the information in this presentation, its accuracy, completeness or by reason of reliance by any person on any of it. This presentation should not be construed as legal, financial or tax advice to any individual, as each individual’s circumstances are different. Readers should consult with their own professional advisors regarding their particular circumstances. The information contained in this presentation is not directed to persons or entities resident in the United States and does not constitute an offer or solicitation by anyone in the United States or in any other jurisdiction in which such an offer or solicitation is not authorized or to any person to whom it is unlawful to make such an offer or solicitation, unless otherwise exempt from United States securities legislation.

THE SECURITIES DESCRIBED IN THE PRESENTATION HAVE NOT BEEN, AND WILL NOT BE, REGISTERED UNDER THE U.S. SECURITIES ACT OF 1933 (THE “SECURITIES ACT”), OR THE SECURITIES LAWS OF ANY STATE OF THE U.S. AND THE SECURITIES MAY NOT BE OFFERED OR SOLD WITHIN THE U.S., EXCEPT PURSUANT TO AN EXEMPTION FROM, OR IN A TRANSACTION NOT SUBJECT, THE REGISTRATION REQUIREMENTS OF THE SECURITIES ACT AND APPLICABLE STATE OR LOCAL SECURITIES LAWS.

FORWARD-LOOKING STATEMENTS

Certain statements in this presentation are “forward-looking statements”. Any statements that express or involve discussions with respect to predictions, expectations, beliefs, plans, projections, objectives, assumptions or future events or performance (often, but not always using words or phrases such as “expect”, “seek”, “endeavour”, “anticipate”, “plan”, “estimate”, “believe”, “intend”, or stating that certain actions, events or results may, could, would, might or will occur or betaken, or achieved) are not statements of historical fact and may be “forward-looking statements”. Forward-looking statements are based on expectations, estimates and projections at the time the statements are made and involve significant known and unknown risks, uncertainties and assumptions which would cause actual results or events to differ materially from those presently anticipated. A number of factors could cause actual results, performance or achievements to be materially different from any future results, performance or achievements that may be expressed or implied by such forward- looking statements. Should one or more of these risks or uncertainties materialize, or should assumptions underlying the forward- looking statements prove incorrect, actual results, performance or achievements could vary materially from those expressed or implied by the forward-looking statements contained in this document. Investors should not place undue reliance on these forward-looking statements. Although the forward-looking statements contained in this document are based upon what the Company’s management currently believes to be reasonable assumptions, the Company cannot assure prospective investors that actual results, performance or achievements will be consistent with these forward-looking statements. Except as required by law, the Company does not have any obligation to advise any person if it becomes aware of any inaccuracy in or omission from any forward-looking statement, nor does it intend, or assume any obligation, to update or revise these forward-looking statements to reflect new events or circumstances.

FUTURE ORIENTED FINANCIAL INFORMATION

To the extent any forward-looking information in this presentation constitutes “future-oriented financial information” or “financial outlooks” within the meaning of applicable Canadian securities laws, such information is being provided to demonstrate the anticipated market penetration and the reader is cautioned that this information may not be appropriate for any other purpose and the reader should not place undue reliance on such future-oriented financial information and financial outlooks. Future oriented-financial information and financial outlooks, as with forward-looking information generally, are, without limitation, based on the assumptions and subject to the risks set out above under the heading “Forward Looking Statements”. The Company’s actual financial position and results of operations may differ materially from management’s current expectations and, as a result, the Company’s revenue and expenses may differ materially from the revenue and expenses profiles provided in this presentation. Such information is presented for illustrative purposes only and may not be an indication of the Company’s actual financial position or results of operations.

MARKET RESEARCH AND PUBLIC DATA

This presentation contains or references certain market, industry and peer group data which is based upon information from independent industry publications, market research, analyst reports and surveys and other publicly available sources. Although the Company believe these sources to be generally reliable, such information is subject to interpretation and cannot be verified with complete certainty due to limits on the availability and reliability of raw data, the voluntary nature of the data gathering process and other inherent limitations and uncertainties. The Company has not independently verified any of the data from third party sources referred to in this presentation and accordingly, the accuracy and completeness of such data is not guaranteed.

This presentation is confidential and is being provided to you solely for your information and may not be reproduced, in whole or in part, in any form or forwarded or further distributed to any other person. Any forwarding, distribution or reproduction of this document in whole or in part is unauthorized. By accepting and reviewing this presentation, you acknowledge and agree (i) to maintain the confidentiality of this document and the information contained herein, (ii) to protect such information in the same manner you protect your own confidential information, which shall be at least a reasonable standard of care and (iii) to not utilize any of the information contained herein except to assist with your evaluation of the Company.

DeFi Technologies Overview

As a publicly listed company, DeFi Technologies (CBOE CA:DEFI, OTC:DEFTF) is leading the way in connecting traditional capital markets with the rapidly evolving, high-growth world of decentralized finance and Web3.

Through DEFI's wholly owned subsidiaries and internal business lines, we provide investors with one-click access to diverse exposure to a broad range of digital asset products, services, and tokens.

Digital assets are transforming the financial system.

DeFi Technologies is a financial technology company that provides investors exposure to a diversified portfolio of leading businesses in the web3 sector as well as direct exposure to digital assets like Bitcoin and Solana. As individuals, businesses, institutions, and even nation states continue to adopt and drive growth in Bitcoin and web3, DEFI Technologies is one of the few publicly traded companies built to give investors broad exposure to these markets and protocols in a regulated and secure manner.

Trusted and Familiar Investment Vehicle

DeFi Technologies is a [publicly traded company](#) founded by web3 industry pioneers to provide regulated and secure access to digital assets and decentralised finance through their traditional brokerage accounts.

Aggressive Revenue Model

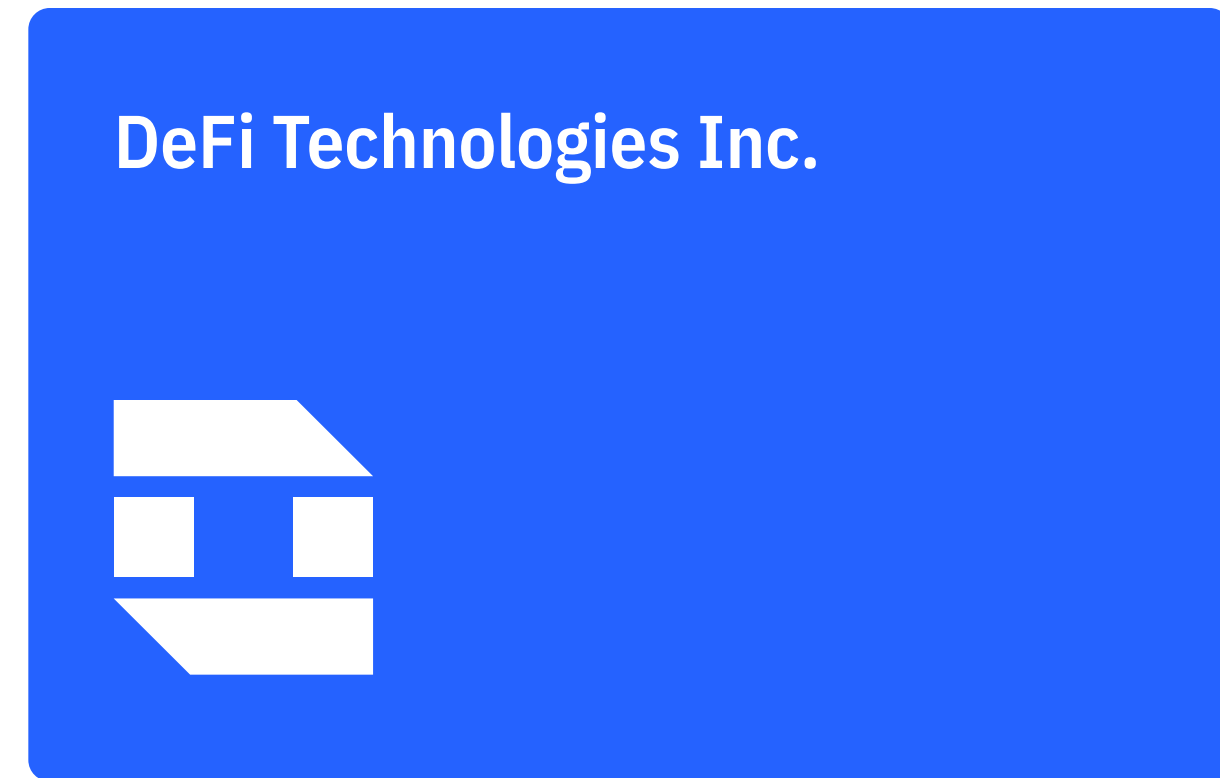

DEFI benefits from a range of scalable income streams such as trading and management fees, staking, lending earnings, and strategic partnerships within the digital asset and DeFi sectors to maximize revenue generation. Our revenue model provides broad exposure to the wave of blockchain based assets, services and applications.

Diversified Exposure

DEFI Technologies offers investors diversified exposure to web3 typically inaccessible through public markets through our wholly owned subsidiaries, venture portfolio, trading desk, treasury strategy, and industry partnerships. This approach enables traditional investors to tap into the extensive \$2.4 trillion sector comprehensively, without the hassle.

Experts in financial markets, digital assets and capital markets technology.

[STRATEGIC PARTNERSHIPS]

The strategic partnership between HIVE and DEFI surrounds the decentralized finance (DeFi) ecosystem with specific application around Ethereum and Miner Extractable Value (MEV). For DEFI the partnership gives exposure to one of the largest miners of Ethereum, which is the backbone on which DeFi applications are built and thus serves as a critical component supporting the sector.

DeFi Technologies Inc. and Neuronomics AG have entered into a landmark Joint Venture Agreement to develop AI-based digital asset exchange traded products, actively managed certificates, and asset-backed tokens for global distribution. The crypto products promise a level of sophistication and efficiency previously unseen, leveraging Neuronomics' advanced AI algorithmic trading strategies and DeFi Technologies' expertise in listing and marketing on OTC markets or regulated stock exchanges.

Valour Inc. partnered with Bitcoin Suisse AG, a leading Swiss crypto-finance firm, to jointly issue 1:1 backed Exchange Traded Products (ETPs) based on digital assets. This collaboration leverages their respective expertise to launch, list, and distribute ETPs in both international and Swiss markets, capitalizing on Bitcoin Suisse's strong brand recognition in crypto assets. Valour Inc. serves as the ETP issuer and exchange listing platform for digital assets under this initiative.

DeFi Technologies partnered with Zero Computing to build critical infrastructure, enhancing DeFi Alpha, the Company's arbitrage trading desk. This partnership aims to improve arbitrage discovery and execution capabilities while advancing zero-knowledge enabled Maximal Extractable Value (MEV) strategies. Leveraging Zero Computing's advanced zero-knowledge proof capabilities will optimize DeFi Alpha's algorithmic strategies, improve transaction privacy, and increase operational efficiency.

Valour is well-positioned to become the leading issuer of digital assets ETPs

Market Demand is High

There is a clear and accelerating market demand from retail and institutions that are unable to hold digital assets directly.

Trust & Security

Retail and institutional investors want securitized products traded on regulated stock exchanges, accessible via their bank or broker.

High-Calibre Team

Valour's executive team consists of industry experts in trading, digital assets, custodianship, FinTech, and capital markets.

Backed by Industry Leaders & Institutions

Valour is partnered with leading firms in the digital assets space such as Bitcoin Suisse, CORE, Hedera, justTrade, and more.

Differentiated From Competitors

Many existing ETP issuers in the European market lack transparency, market-making skills and digital asset expertise. Our partnerships with web3 foundations further differentiates us in the marketplace.

Product Innovation

Valour launched the world's first fee-free Bitcoin ETP and world's first yield-bearing Bitcoin ETP, and continues to innovate.

ETPs provide investors with several benefits over buying crypto directly

Diversity

Valour's ETPs provide investors with unparalleled access to single digital assets and comprehensive digital asset indexes through single trades.

Transparency

Valour's ETPs have a clear and consistent link between their price and the price of the underlyings.

Security

Valour's ETPs provide trusted access to digital asset exposure through regulated exchanges and brokers, with the underlyings 100% hedged at all times.

Simplicity

There is a clear and accelerating market demand from retail and institutions that are unable to hold digital assets directly.

Low Fees

Retail and institutional investors want securitized products traded on regulated stock exchanges, accessible via their bank or broker.

Identifying and Investing in the Future

The landscape for decentralized finance is continuously evolving, building upon and improving traditional financial offerings. From lending and borrowing markets to automated market makers and high yield liquidity pools, the financial giants of tomorrow are innovating on the blockchain today.

Working with world leading names across the DeFi space, DEFI's research-based early-stage venture arm backs ambitious founders and high potential projects and networks across decentralized finance and Web3.0, focusing on Pre-Seed to Series A ventures.

The landscape for decentralized finance is continuously evolving, building upon and improving traditional financial offerings. From lending and borrowing markets to automated market makers and high yield liquidity pools, the financial giants of tomorrow are innovating on the blockchain today.

Working with world leading names across the DeFi space, DEFI's research-based early-stage venture arm backs ambitious founders and high potential projects and networks across decentralized finance and Web3.0, focusing on Pre-Seed to Series A ventures.

Providing independent governance or data for decentralized networks to run independent nodes that will validate transactions

DeFi Infrastructure exists to further advance the mission of decentralized finance through its contributions towards overall ecosystem improvements in areas of governance, security, ESG compliance and transparency.

By engaging in the provision and maintenance of decentralized node solutions, DeFi Technologies helps further establish secure and reliable networks through validating, voting, and increasing overall decentralization.

Through partnerships with industry-leading service providers, DeFi Technologies facilitates the bridging of high-fidelity real-world data into the world of DeFi, increasing confidence and trust in current decentralized finance offerings.

By processing transactions and participating in consensus, DeFi Technologies supports the growth and performance of the Solana network. In connection with running the node, DeFi Technologies can receive rewards from securing transactions on Solana as well as for providing governance services such as voting on code changes and other upgrades to the globally decentralized network.

coinbase

DeFi Technologies partnered with Coinbase Cloud (formerly Bison Trails) to expand its secure node infrastructure to power staking and DeFi applications. Coinbase Cloud is a leading blockchain infrastructure platform-as-a-service company, providing secure infrastructure for both staking as well as development capabilities across multiple protocols.

The Pyth network is a specialized oracle solution for latency-sensitive financial data that is typically kept behind the "walled gardens" of centralized institutions. DeFi Technologies provides real-time cryptocurrency pricing data to the Pyth network to improve DeFi market transparency.

Core Chain is a cutting-edge, Bitcoin-powered, EVM-compatible blockchain that integrates Bitcoin miners and BTC stakers into its security in exchange for rewards. Validators are a fundamental component of Core's consensus mechanism, Satoshi Plus consensus, responsible for validating transactions and producing blocks on the Core network.

Leading research firm specializing in the creation of high-quality, in-depth research reports for the cryptocurrency industry.

Reflexivity, co-founded by Anthony Pompliano and Will Clemente, offers high-quality crypto-native research tailored for traditional finance investors. Trusted by major cryptocurrency organizations like, Solana, and Avalanche, Reflexivity distributes its analysis through its website, social media, and a large email list, generating positive cash flow. They also leverage partnerships with platforms such as CoinMarketCap for extensive distribution.

DEFI and Valour are committed to building a sustainable future for its investors, the decentralised finance ecosystem and beyond

Valour Bitcoin Carbon Neutral ETP provides investors with sustainable and climate-friendly exposure to Bitcoin. The carbon neutral ETP presents a trusted investment option which benefits the environment and aligns with ESG goals by funding certified carbon removal and offset initiatives in order to neutralise the associated bitcoin carbon footprint.

Innovation lies at the core of Valour's proposition. Working with our partner Patch, we have developed a proven route to decarbonize the footprint of our Valour BTC Carbon Neutral ETP. In doing so, Valour has identified and reviewed industry benchmarks and best practices to ensure that all aspects of the structure follow the latest research principles and actionable recommendations. Abiding by the highest standards and deploying a methodology that most accurately calculates the emissions relating to Bitcoin, Valour stands at the forefront of the crypto industry, promoting sustainable development through proven quality carbon avoidance and removal projects.

As a Crypto Climate Accord (CCA) supporter, DEFI has committed to supporting the CCA's objectives and to helping advise, develop, and scale solutions in support of the CCA and ESG compliance.

The CCA's overall objective is to decarbonise the global crypto industry by prioritizing climate stewardship and supporting the entire crypto industry's transition to net zero greenhouse gas emissions by 2040.

The CCA has two specific interim objectives:

01

Achieve net-zero emissions from electricity consumption for CCA Signatories by 2030

02

Develop standards, tools, and technologies with CCA Supporters to accelerate the adoption of and verify progress toward 100% renewable-powered blockchains by the 2025 UNFCCC COP30 conference.

Thank you.
